1. About Delion Project

Cryptocurrency business is exploding and growing rapidly despite all the challenges.

Over two years we have seen blockchain technology evolved and getting better and better. Blockchain technology has been integrated into so many industries.

As we know blockchain has evolved from the Proof of Work (PoW) to Proof of Stake (PoS). Either PoW or PoS both are introducing a new feature called Masternode, encourage people to build nodes to secure the blockchain.

Masternode driven investors have grown exponentially in just a year. We see this as an opportunity:

- a. To adopt blockchain technology into our existing business.
- b. To provide platforms for Masternode investors. With new features, investors with only little tech knowledge can deploy a Masternode in minutes.
- c. To fill the gap between fiats and cryptocurrency. Will be explained below on “Use Case” section

Masternode industry and cryptocurrency itself are still growing and we want to enter the market by providing solutions for Masternode investors

2. Delion Coin Specification

Delion blockchain or Delion coin is the currency that will be used as payment system in all our products and services.

4. Delion coin's use case

Delion Project is created to give cryptocurrency masternode solution in one platform.

Our long term plan is also to apply Peer to Peer Funding from International funds to construction projects and financial technology company where all investment and payment will be done using Delion Coin.

Investors can get involved in each project by depositing some amount of Delion Coins. After the completion of the projects, investors will get back all their Delion Coins plus profit sharing from the profit of the projects according on how much shares portion investors have when invested in a project.

Delion Masternode is another way to generate Passive Income with only little technical knowledge.

Delion coin will be used as a voting point and payment method on Masternode Hosting platform

Delion Coin also will be used as listing fees on ShineDex.com

The conclusion is Delion Coin will be used as the default currency on everything happen on Delion Platform.
